

Carbon Canisters

Pore Size Distribution

Feature: Filtration Systems' carbon has over 700 m²/g surface area.

Advantage: Competitors carbon has less pore volume

Benefit: Longer life, higher capacity

Coal-Based Carbon

Feature: We use coal based carbon

Advantage: Much harder than lignite or cocoanut-based carbon

Benefit: Less dust and fewer start-up problems

Steel Cable Handles

Feature: Filtration Systems uses heavy-duty steel cable for its handles

Advantage: Stronger than competitor's wire handles

Benefit: Handles won't fail during installation and removal

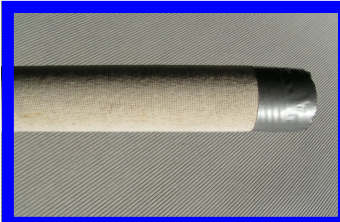

Buna N Gasket

Feature: Filtration Systems uses 100% Buna N Gaskets

Advantage: Competitors use a "Buna-blend"

Benefit: Gaskets will not swell in service & have high temperature resistance

Sealed Top of Center Tube

Feature: We seal the top 3-inches of our center tubes

Advantage: Competitor's filters do not have this feature

Benefit: Filters will not bypass if carbon bed settles
