

Pleated Fiberglass

Hydrophobic Fiberglass Media

Feature: Filtration Systems uses water-repellant microfiberglass media.

Advantage: Most competitors' media is not hydrophobic.

Benefit: Better liquids removal from natural gas.

Computer Controlled Pleater

Feature: Our pleater gently folds the media with computerized accuracy

Advantage: Other types of pleaters can crack or perforate the pleat apex

Benefit: More consistent product and performance

Choice of Media Backings

Feature: We make both screen- & paper-reinforced pleat packs

Advantage: Other manufacturers offer only one construction

Benefit: Different price-points for various service conditions

Felt Drainage Layer

Feature: Filtration Systems adds a polyester felt outer drainage layer

Advantage: Other designs require a 2nd-stage separator

Benefit: Better liquid-separation performance
