

Fiberglass

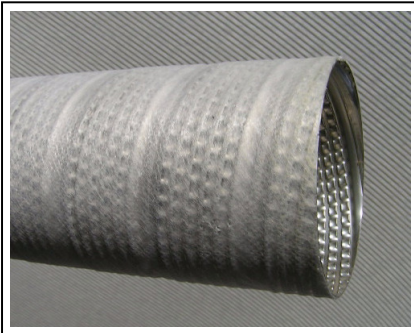

Fiberglass Media

Feature: We use molded seamless bonded tubes

Advantage: Some use slit unbonded pipe insulation.

Benefit: Better filtration performance without bypass.

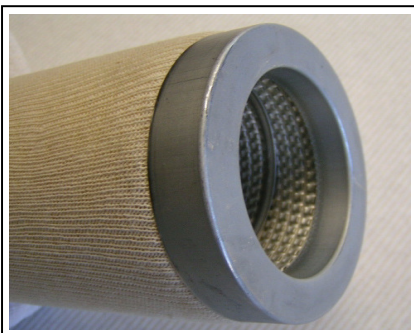

Wrapped Center Tube

Feature: Our core wrap prevents media migration.

Advantage: Many others don't wrap their center tubes.

Benefit: No abrasive fibers will get released from the filter.

Metal End Caps

Feature: Filtration Systems uses metal end caps.

Advantage: Others may use plastic caps, or no caps at all.

Benefit: Sturdier, more reliable construction.

Buna-N Gaskets

Feature: Our gaskets are 100% Buna-N (nitrile).

Advantage: Others may use less expensive "Buna-blends".

Benefit: Gaskets will not swell in natural gas service.
