

Panel Air Filters

Pleated Media

Feature: Filtration Systems has a variety of media for all types of applications

Advantage: Competition only offers 1 or 2 varieties

Benefit: Optimum design for high flow, flame retardant or moist conditions

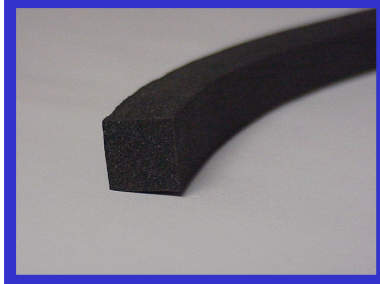

Computer Controlled Pleater

Feature: Our computer controlled pleater makes sharp straight folds

Advantage: Older cam operated pleaters don't have repeatable performance

Benefit: Consistent product and better air flow characteristics

Poron® Gasket

Feature: Our patented Poron® urethane gasket resists compression-set

Advantage: Most competitors use generic neoprene gaskets

Benefit: Filters will seal better, improving filtration performance

® Poron is a trademark of Rodgers Corporation

Panel Frame

Feature: Our channel is recessed at corners

Advantage: Provides smooth gasket-sealing surface

Benefit: Eliminates leakage for better performance

Four-Piece Frame Construction

Feature: Filtration Systems uses a rigid 4-piece metal frame

Advantage: Competitors 1-piece frame can leak, especially at corners

Benefit: Eliminates leakage for better filtration performance
